

ABSTRACT

A system for mounting a flat panel display. A mounting plate includes a first surface portion. A support arm includes an outward extending radial flange at a first end which abuts the first surface portion of the mounting plate. A cover includes an aperture and is affixed to the mounting plate such that the radial flange is disposed between the cover and the mounting plate with a second end of the support arm extending through the aperture. A flat panel display bracket is affixed to the second end of the support arm. The support arm may optionally be an articulating arm.
